

2020-02-04

WEEKLY MEETING PLAN

1. CURRENT PROGRESS

Review the current progress together. By now we have completed three milestones and 11 related issues.

Done list

- i. Frontend theme has been designed, and the code is ported to the Django project;
- ii. First version of login system has been finished and published on webserver for preview.
- iii. CI server has been setup and is ready to connect.
- iv. The template of "Requirements Specification" is released.

2. PROBLEMS AND CONCERNS

The process is kind of slow, because we still have three main functions (reservation, ordering, waiting list) that has not even been touched.

Also the documents need to be finished as soon as possible because the instructor wants to see these materials by midterm.

3. PLAN FOR THE NEXT WEEK

Make a detailed plan for the next week, and assign major tasks for each member.

To do list:

- i. Unit test for login system, and test the login/sign up functions with CI server;
- ii. Functional design for reservation system, write some basic code;
- iii. Design database tables of the table information that is used for both reservation and waiting list system.
- iv. Figure out a proper frontend pattern for the reservation system.
- v. Refine the outline of "Requirements Specification" and start to work on the main content.
