Participants	
Type	Ad Hoc

Goals

- choose a topic
- allocate jobs

Discussion Items

- We decided to build a website for a restaurant. The basic functions include book a reservation and order food.
- We will have a weekly meeting on Tuesday @ 2:35pm in DC 3572
- Front end group : Alyssa, Yeganeh, Evan
- Back end group: Harold, Betty, Dawson
- Integration test & Continuous integration: Chen
- Documents: Each member should write their own part and Yeganeh will finalize the report.
- Meeting notes and meeting plan: Betty, Evan

Action Items

- ☐ Familiar with Github and Git for version control (commit, merge, branch)

- ☐ Read github report written by Tong
- ☐ Front end group: learn front end technology such as HTML, CSS, Javascript
- ☐ Back end group: learn the procedure of back end development: server, database etc.
- ☐ Specify the basic function and design a rough architecture of the system.
